1. https://www.rfc-editor.org/rfc/pdfrfc/rfc8484.txt.pdf

   DNS over HTTPS (DoH) – Sending DNS queries over the HTTPS protocol can drastically increase security and speed.

2. https://web.archive.org/web/20090117023500/http://www.nsa.gov/business/programs/elliptic _curve.shtml
   DNSCurve – Uses elliptic curve cryptosystems for vastly superior security and more performance compared to first generation public key systems.
